Tags: **52mm**

An adapter to use 52mm filters with an Fuji Instax mini EVO. It just pushes onto the lens barrel. A previous design was too tight and could pull off the lens barrel when removing the print.

CAUTION: to remove use your thumbnail to push against the silver sliver of the lens barrel and keep that in place. Please see this 1 minute video for removing the adapter:

If you aren't into 3d printing and just want a copy you can buy one from me at:

https://www.etsy.com/listing/1428591789/mini-evo-filter-lens-filter-adapters?ref=listings_manager_grid

comes in many colors, 3 different sizes and with metal threads that don't wear out as fast as plastic.
