updated 8. 10. 2022 | published 8. 10. 2022

Summary

A simplistic spotlight mount for IKEA Lakene (discontinued unfortunately), but might work for others.

This is a simple holder for an IKEA “Lakene” spotlight. I haven't tried it with anything else, but reasonably, anything with the same size and general mechanical properties should work.

Use supports.

Screw the holder to whatever you want to fit it to, insert the lamp. Don't use anything that gets too hot (i.e only leds, and not too high power ones), or it will likely burn your house down.
