Summary

A model, based on 5 polygons and a circle, intended to be printed in Vase Mode or your slicer's equivalent.

Tags: [polygon](#) [vase](#) [vasemode](#)

This is a vase that I designed by using 5 polygons (octagon, heptagon, hexagon, pentagon, and square) as reference, and a circle for the opening.

It prints well at any scale and with any material, and is intended to be printed in Vase Mode.
