Summary

This is a holder for a Gordak 863 (and similar) hot air handle. Imported from my design at the other place.

This is a holder for a (fits mine anyway) gordak 863 (and similar) hot air handle.

Source file is included (freecad), but the order I've designed it is suboptimal for redesign.

The screw holes should be easy to customize if needed.

I used 4 x 3 mm allen / hex bolts to fasten the holder to a piece of metal, as in the picture.

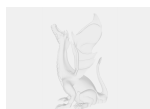

More stable than the original, but - as usual - don't blame me if your house burns down. I have used it successfully since 2020.

Print with your favorite settings.
