This is a spool holder specifically for the Creality Cr-10 and Creality CR-10s as it mounts to the top of the control box!

You will need:

4 x Prints

4 x Skateboard bearings

Superglue

Simply print 4 of the same file, pop the bearings on with a bit of superglue (they are not a tight fit) and then glue both halves together. The prints sit on the control box of the CR-10 and CR-10s 3D printer, and can be moved up or down depending on the width of the spool you are using.
