We print this one for our donation project in Indonesia, this is a remix version of brazil version with some modification

- 1.) Use the bigger hook and longer frame handle for hook
- 2.) We put 2 more punch hole to attach the transparent shield for better protection
- 3.) Wider bottom reinforcement

We print this one on PETG using 0.8 nozzle and 0.48 Layer height, with 3 perimeter, the print duration approximately ~ 1hr 20min

Print instructions

PETG using 0.8 nozzle and 0.48 Layer height, with 3 perimeter, print duration approximately ~ 1hr 20min
