Summary

Small part to lift the dustbin from the robot

[Household](#) > [Other House Equipment](#)

Tags: [handle](#) [robot](#) [vacuumcleaner](#) [dustbin](#)

I got an used VR100 as spare parts donor that was completey intact apart from a broken display and a the missing green handle that you need to lift the dustbin. So I re-created that little piece to completement the dustbin.

Update: added a version with slightly extended shafts. There is enough space in the dustbin and this can save you from printing the part again in case you overtightened the screws and broke the shaft.
