Summary

To prevent your kid from using drawer handles as ladders use these slopes with double sided tape.

SEND ME YOUR DRAWER HANDLE MEASUREMENTS

This shall be a big collection of furniture handles and their equivalent slopes to make them child proof. Since i have only so much funiture in my apartment, just send me the measurements of your drawer handle and i will design the fitting slope for it.

Ladders everywhere

My litte one just startet to pull her self up on every ledge she can find. After a while i realized how many "ladders" there are in just one apartment. Also she startet loosing her grip on those drawer handles and fell. This way the idea was born to fit the lowest drawer handles with slopes to make it impossible for her to get a grip on those drawers.

This stops her from pulling out the drawers as well as using the handle as a step to climb the furniture. As a parent you just have to adjust your grip on the handle to pull the drawer open. Since i used double sided tape to fix the slopes in place i have no problem removing the slopes as soon as they are not needed anymore.

Slope collection

Segmüller square Ikea-Kitchen

Printsettings

As you prefere. Since the slopes have to support your grip and your child working on it, make it not too light.

- 0.2-0.3mm Layerhight
- no Support needed
- 15-35% Infill
- 3-4 perimeters
