Summary

This jig will help you with adjusting chain slack in your tracer 9 or tracer 9 GT

[Hobby & Makers](#) > [Automotive](#)

Tags: [tracer](#) [yamaha](#) [yamahabike](#)

This jig will help you with adjusting chain slack, normally you would need to adjust and check the slack, but with this jig, you just place it on the chain guide and adjust the slack until it touches the jig.

Factory spec is between 45mm to 50mm. I've included 6 sizes, i would suggest to use 46mm or 47mm.
