### Summary

Cupholder Twin 1 to 2 side mounted , was not able to find any so I had to make it for my sons car , works pretty well.

I made this in PETG with 0.4 nozzle 0.3 layers 3 walls and 25% Cubic infill and then I found 2x drywall screws in the workshop , thats it, so simple it almost hurts :-)

Note this is made for a Ford Fiesta 2005 but will fit many car models.

Pro tip ! , if it turns around use a rubberband in the lower part.

Enjoy !
