The Valorant Xenohunter melee knife is part of the Xenohunter Collection. This is a five skin bundle released on June 8th 2022 and includes melee knife, a Frenzy, Bucky, Phantom and Odin. Based on the Alien franchise, the weapon designs are straightforward and functional, but with a realistic, detailed and rugged finish. Each gun skin also comes with an unlockable side-panel that pops out with a mini-map and location/heart-beat sensor - though this is purely aesthetic.
