As the title says, this is a cookie cutter that cuts octagon shaped cookies, but it also has a spiral shape on the top, which you can use to press a shape onto your cookies.

This model can of course be any size you want according to your needs, but i would recommend anywhere from 6-8 centimeters.

This model is supposed to be printed with the spiral shape facing down, so your printer doesn't have to bridge a large gap. I have not tried printing this model yet, however i will have it printed very soon.

This is one of my first models on Printables, but please give me feedback, and ask me if there's something on your mind :).
