Summary

I designed this in 2 pieces. The main body and the top cover. It allows you to organize the fan wires.

[Hobby & Makers](#) > [Other Ideas](#)

I designed this in 2 pieces. The main body is held in place by the oem screws, and the top cover snaps in place to cover the wires and screw heads.

You will need supports under the large bridged flat area. I used linear type supports and the auto-support option.
