Noone makes a mount for this excellent laser rangefinder. Until now!

It fits the Nikon RangeX snugly, and lets you mount it to the rails on your spotting scope, to an Arca style tripod head, and has a 3/4" hole in the bottom so you can epoxy in a 1/4-20 screw insert for standard tripod mounting.

The Picatinny rail mounts need a 10-32 x 1.5" long socket head cap screw and a matching 10-32 nut. The nut receptacle is sized for a 3/8 wrench fit 10-32 nut.

It prints great using PLA or ABS. Add your own supports as needed.

If you print one, post a pic here for all to see!
