This is a pegboard holder for the Lee Safety Prime (newer version with the triangle tray) primer feed system. It mounts to 1/4" pegboard using the push rivets I designed for these pegboard holders.

Print using PLA with supports for the overhang. 15% infill should be fine.

I have not made one of these yet. Ill print some this evening and post a pic.

Edited to add: pic is up. Perfect fit!

Category: 3D Printing
