Summary

Works with PLA or ABS. Use supports at your own discretion. I printed several of these with no supports whatsoever....

[Hobby & Makers](#) > [Other Ideas](#)

Works with PLA or ABS. Use supports at your own discretion. I printed several of these with no supports whatsoever.

Redesigned using metric measurements as most 3d print software is metric.

I wanted a better designed and more substantial weigh pan, so I designed this one.

It has 3 handles so you can pick it up from any angle, and it has 3 pour spouts, so you can pour regardless of how you pick it up off the scale.

Category: 3D Printing
