Summary

This is a simple pegboard holder which allows you to display your Edge Technology Z axis touch off gauge.

[3D Printers](#) > [Accessories](#)

Print this with something cool looking, as it will be on display in your shop. I used titanium silk PLA. It will need some support as there are 2 areas that are horizontal and well above the deck. Support with a roof or top solid layer would be ideal because if the shelves have a poor surface finish, the gauge may have trouble fitting.

I like the 1/4" (6.35mm) auto body fasteners pictured for fastening this to the pegboard.
