## Summary

This is a pegboard holder for the Edge Technology Pro Tram. The Pro Tram is a milling machine head tram tool.

---

This should be printed in something that looks cool, like silk PLA or similar. It will be holding one of your coolest looking shop tools, and displaying it for all to see.

This should print with a minimum of fuss. I used a raft, but no supports and it came out pretty good.

1/4" (6.35mm) auto body plastic rivets are great for mounting these to pegboards. Its like, 8\$ for a bag of a hundred of these things on Amazon.
