Summary

Onewheel XR rail guards I made with fusion 360

[Sports & Outdoor](#) > [Outdoor Sports](#)

Tags: [onewheel](#) [onewheelaccessories](#) [onewheelxr](#) [xr](#)

The first time I printed it in PETG and it has held up really well. After a month or so one finally cracked. The next set I'll print in PLA+.

Edit:

I've added a piece with the Onewheel logo in it.
