### Summary

A Nerf Titan Missile Launcher designed for minifigures to use in Nerf wars!

Tags: [lego](#) [legocompatible](#) [minifig](#) [nerf](#)

This is a design I did a couple weeks ago to test out a new modelling program. I designed it for resin printing, but if you're crazy enough to try it with an FDM machine, you're my kind of crazy.

Tolerances for the missile should hopefully be good, but let me know if there's issues and I'd be glad to loosen/tighten up the fit as needed. Good luck and happy printing!
