This is a keychain/wallmount for the flic 2 button. I sketched this up in fusion 360 and used [Hatchbox](#) filament for my prints. If you have an issue of the top not fitting tight enough scale the model down in the X and Y axis by 1 or 2%. Uploaded Step files incase anyone needs to redesign. Made a lot of cut outs on the top and bottom section to help with leverage incase the top and bottom sections get stuck or the Flic 2 button gets stuck in the bottom.
