Print and make you very own Marksman Revolver! The front of the gun has a small lip for a piece of 3mm acrylic to fit in and potentially light with leds like the game. The chamber has a hole made for a skateboard bearing to fit in. This is my first big modeling project, so there may be some issues with the parts, but I have tried by best to make sure everything has the correct tolerances and is faithful to the game. Please tell me if you run into an issue that I should fix!
