### Summary

Clip to hold in place (under the kitchen cabinets) the 6.5mm or 1/4" flexible pipe - that supplies water to my fridge.

The water / ice dispenser in my fridge is plumbed in via a 6.5mm (1/4") water pipe/hose, which runs under the kitchen cabinets. I found the commercially available 'hose clips' to be too small and over time they would drop off, so I designed this longer clip/mount as a replacement.

The much larger surface area gives a better bond to the kitchen cabinets, and the longer length better counters the flexible hose's propensity to twist.

The hose / pipe will just clip in and hold even upside down under the kitchen cabinet but there are cutout to add cable ties for extra security should you want / need them.

I have used 3M VHB tape to mount the clips to the kitchen units.
