Replacement tips for lost or worn out earbuds. I decided to try printing them from PLA and since they would not be flexible, I made them slightly smaller. This model has an outside diameter of 10.5mm. These were just comfortable for me while not falling out of my ears but you may need to increase the size. Also the hole in the center was set for my pair of earbuds and you may also need to adjust. The model can be accessed at "www.tinkercad.com/embed/j34wCHf5OY6?".

Please let me know if you find this design useful!
