updated 10. 4. 2020 | published 10. 4. 2020

Summary

Could never find a shroud i liked or that wouldn't keep melting from being to close the the block.

[mosquito](#) [shroud](#) [bnbsx](#)

Could never find a shroud i liked or that wouldn't keep melting from being to close the the block. I also wanted a better viewpoint of the nozzle. This remix covers both of those issues.

Print instructions

I printed in Priline CFPC. no size adjusting was needed. recommend drilling or reaming holes as they can be tight. print no larger than .2 layer height. NO SUPPORTS NEEDED. Happy Printing.

This remix is based on

Delta-P fan duct for BEAR extruder
