40mm to 20mm Desk Cable Entry.

Designed to neaten up those large holes to run cable through.

Some sealed power plugs are 40mm and need a 40mm hole drilled into desk to run through back.

Infill 20%

thickness of desk wall was 20mm so I designed clip to fit and hold the front and back together.

Works quite well and has not come apart.

recommend rotating clip to way it mounts in photo for printing. (adds strength)
