GO PRO Blower Gutter Cleaner Attachment.

Used 40% grid infill with Cura(feel free to increase if needed). I wanted something that would not break easy.

Clamp fits on a 48-50mm diameter pipe.

I thickened the hinged area because it was a weak point on earlier models.

Used 6mm caphead and wingnut on clamp and standard Go pro tripod and 6mmX16mm for fixing the camera to the clamp.

I did this to learn "print in place".

Works great, my son cleans the gutters now.

Printer Brand:

Creality

Printer:

Ender 3

Resolution:

0.2

Infill:

40%

Filament: Pantech PLA Does Not Matter How I Designed This

=====

I designed this with Fusion 360, I bought the gutter cleaning attachment for my blower but thought if I had a camera I can see if the gutters are clean without having to get a ladder.
