## Summary

Replacement end-caps for a generic projector screen, for mounting to a wall on the front side of the screen

[Gadgets](#) > [Photo & Video](#)

Tags: [mountingbracket](#) [projector](#) [wallmounting](#)  
[projectorscreen](#)

Needed to mount a generic spring loaded pull-up projector screen to a wooden beam from the front part of the screen.

Built in mounting options only allowed mounting to the ceiling, or to a wall on the back side of the screen.

These end caps replace the built-in endcaps, end modifies the mounting holes - leaving the option to mount to a wall from the front.

Installing the new endcaps requires re-tensioning the screen (as removing the old ones releases the tension) - a quick google search shows how to do this
