Overview

This honeycomb vase can serve as a great decorative vase or pencil holder. It is designed to be scalable and printed in vase mode, so if you resize the model just make sure you're printing in vase mode.

Printing

No supports necessary since you're printing in vase mode! I printed using silk rainbow PLA on the Prusa i3 MK3.

You can resize the model in the slicer and the vase mode setting will take care of the rest.

Please like it if you do and leave any comments!
