### Summary

Trays for discovery cards (sleeved) and injury cards (sleeved, non sleeved) for Awaken Realm's ISS Vanguard boardgame.

[Toys & Games](#) > [Board Games](#)

Trays for discovery cards (sleeved) and injury cards (sleeved and non sleeved) for Awaken Realm's ISS Vanguard boardgame.

With my basic design skills, they help keep the cards nice and organized at top edge of the exploration book. Slightly inclined so that cards stay in place.

The 5 space tray is for the 5 different discovery type decks; they fit sleeved cards as these decks get shuffled. This tray is a little taller than the other to account for sleeve with (with 50 micron sleeves, if taller is needed let me know in comments!)

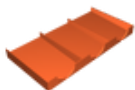

The smaller tray, which should be printed twice, will hold the 6 types of injuries. These are not sized for sleeves - I saw no need for sleeves here as these decks never get shuffled. If someone wants a sleeve version let me know!

Printed with 0.6 nozzle at 0.30 layer height. The large one has to be rotated to fit the print bed.

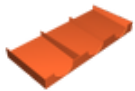

Edit - I was asked to split the discovery cards tray for smaller printers - also including then two separated trays, one with 2 spaces, one with 3.

Edit - 16.09.2023 - Added sleeved tray for injury cards. I made this for 50x70 sleeved but I have not tested it - if you do, please let me know if it works well!
