[762x54r](#) [9mm](#) [10mmauto](#) [12gauge](#) [shotgun](#)

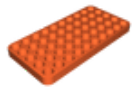

Loading blocks for reloading ammunition. The .223 block will also work with 9mm, 380 auto and .357, the 7.62 x54R block should work with other large rimmed cases (I had to make it 5x5 to fit my printer), the 308 block works with anything derived off the 30-06 case. Printed on a [Prusa Mini+](#). I printed them as a draft with 10% infill for speed. They don't need anything more than that. I added a 45-70 block that I haven't printed or tested.

Model files

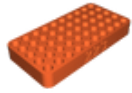

9mm-load-block.stl

☐ fits .380 Auto and others

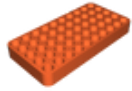

10mm-load-block.stl

☐ fits .45 Auto and others

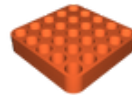

223-load-block.stl

☐ fits 30 M1 Carbine

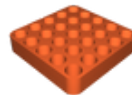

308-load-block.stl

☐ fits any 30/06 sized case

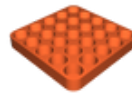

762x54r_load_block_half_rnd.stl

45-70-load-block.stl

☐ I have not printed or tested this size

12-gauge-shotshell-25-round.stl
