This is an small Capsule holder /dispenser / magazine for Dolce Gusto capsules but especially intended for refill capsules like the ones from iCafilas.

It can be used standing or screwed to something in you kitchen, it already has countersunk screw holes, of course you can also use double sided tape.

There are multiple sizes available.

It is designed to be easy to print without support (but use maximum parts cooling!) and being a single part. If you don't have very good parts cooling on you printer, then print it laying on its back.
