### Summary

Made a basic vaseshape, thats easy to scale and also is superrigid through the findesign. Print hint at description.

Tags: [vase](#) [vasemode](#) [decorationvase](#)

I modeled this vase after i did the luxury vase, because i wanted one thats easier to scale.

I also made a tripleversion of this, and changed the design a tad for that. Looks also amazing printed. :)

Prints best with an 0.6 or 0.8mm nozzle and a wallwidth of 1.2mm.

If you have to go with a 0.4mm nozzle, please note that vasemode can be used with double the layerwidth, and you should use that for these (and all other) vases if you print with a 0.4mm nozzle. So, simply set the layerwidth to 0.8mm.

Happy printing!
