I needed to mount my touchscreen and did not need a full blown case. 15 degree bracket for 11/2022 generation of RPI 10.1" touchscreens with top and bottom mounting lobes. I have the NORSMIC 10.1" 1024x600 version.

This can be clamped or screwed to a flat surface. Reuse the included face screws and clamp between screen and RPI header underside. STL is oriented for printing on common 220x220 platforms.

I left room for RPI header and USB access. Model can be easily altered in Tinkercad etc. to fit your needs. The cutouts accommodate the speakers and some PCB circuitry.
