This tag shows if mail has arrived. Suits well for European mail boxes which don't have the indicator similar to US traditional mailboxes.

There is slot for 4x2mm magnets to keep the indicator up. You can print without magnets. Just make the fit a bit snug so indicator does not drop down automatically.

Attached to mailbox with double sided tape.

**

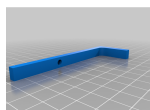

Update 2024-6-7. This has been in use for roughly 2 years. I had to super glue it to the mail box because every type of sticker/tape came loose when

it was -30 degrees C. Now works flawlessly and my first world problem of checking the box too often is solved.

Material PLA, .35 layer height. Prusa Mk2

Category: Outdoor & Garden
