### +++ Pixel Vase +++

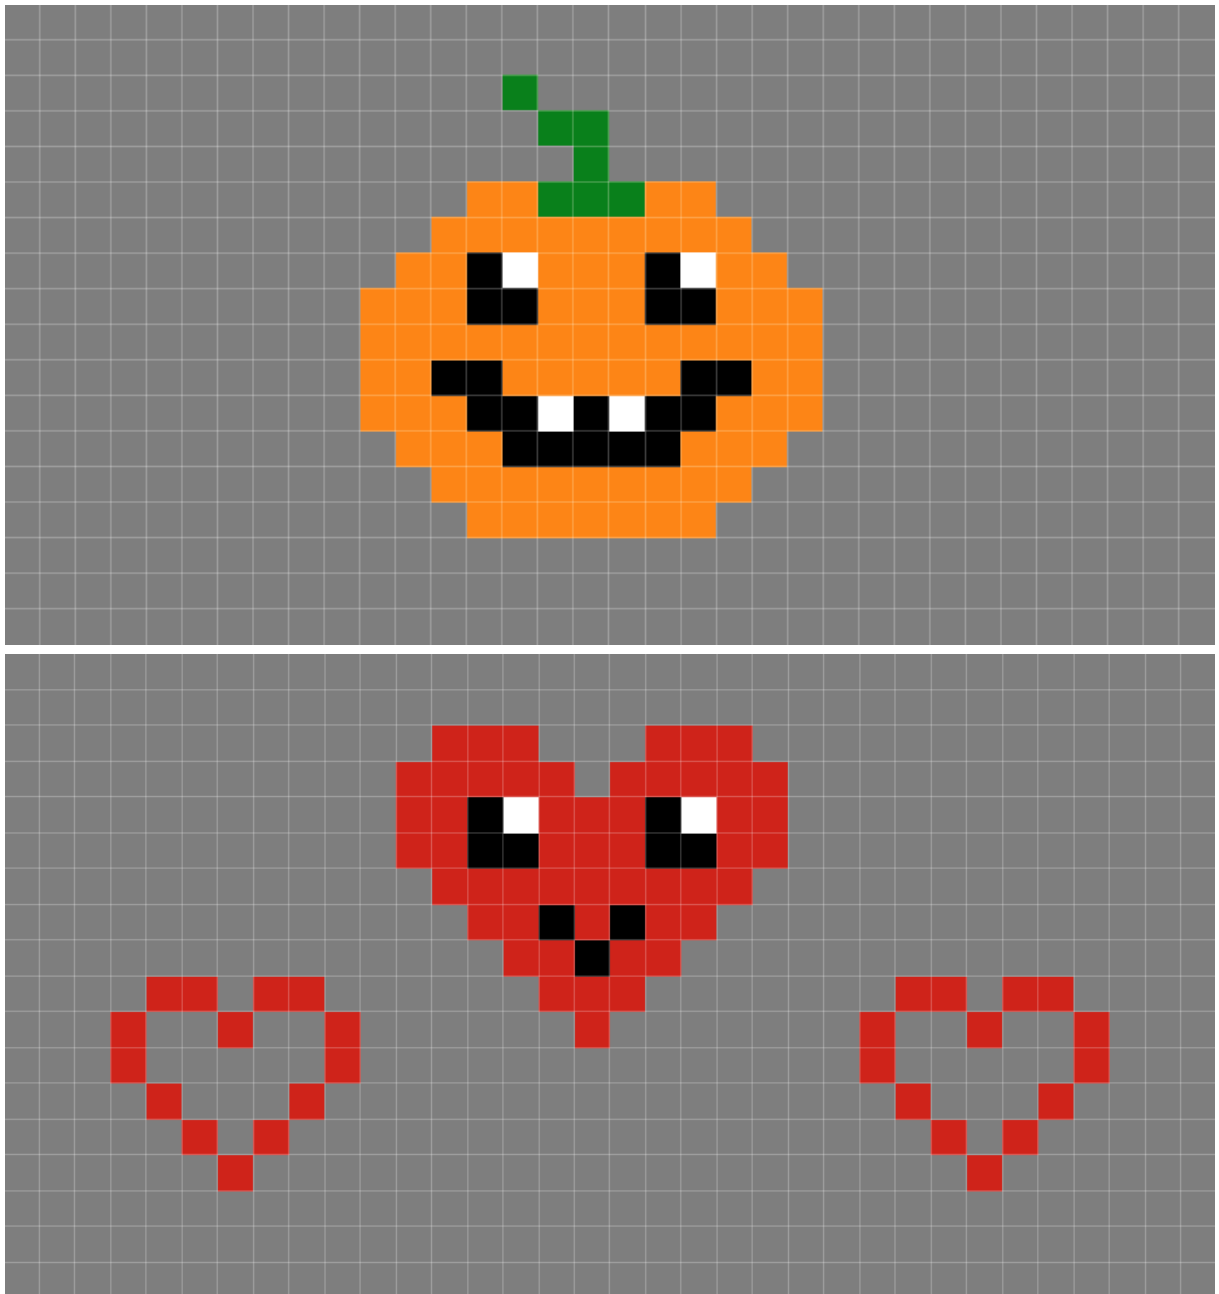

Be creative and create your own "Pixel Vase". There are tons of possible sceneries. The resolution is 18 pixels high and 34 pixels wide.

That means 612 pixels just waiting for you!

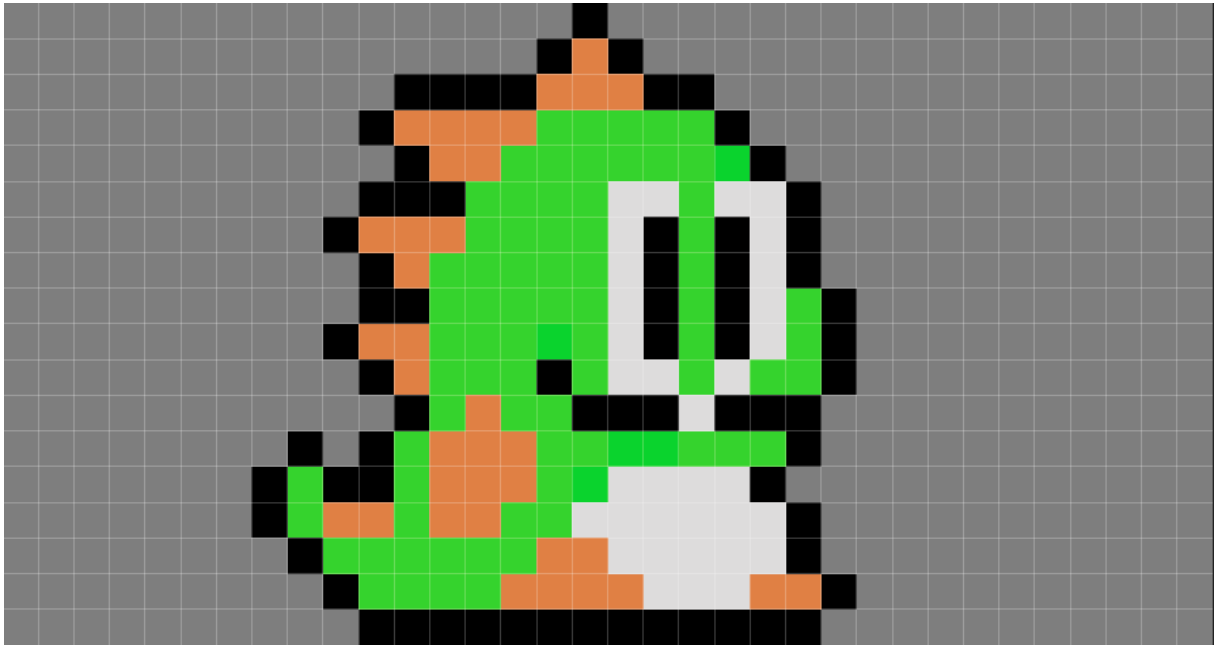

Since the idea arose quite late, various example motifs will follow later.

I created a few well-known pixel arts in the vase grid. I am very excited about your sceneries or your designs!

A nice looking pixelart, which was send to me from [mattoni](#)

## **\*\*Print Instructions\*\***

### **\*Pixel Vase**

Supports: No  
Resolution: 0.2mm  
Infill: 15%

### **\*Pixels**

Supports: No  
Resolution: 0.15mm  
Infill: 0%

### **\*Pixel Vase in vasemode**

Nozzle: 0.4mm  
Resolution: 0.2mm

I used PLA for the shown prints.
