Summary

Full-face dust masks are very expensive but full-face military surplus masks are quite cheap.

Full-face dust masks are very expensive but full-face military surplus masks are quite cheap. So I made adapter from NATO 40mm x 1/7 (gas mask standard thread) to Secura filter connector. Secura is polish local brand of safty equipment. Most probably this adapter is useless for You, if You don't live in Poland.

This adapter will NOT fit to 3M filters!

Print instructions

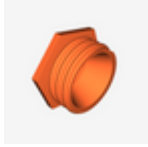

If you chose ABS, DO NOT use this adapter around acetone or paint! For simplyfy3d users I sugest infill 50% for bottom part and 100% for top. If you use slic3r use 50% infill and increse wall thickness so top part end up solid.

Gasket dimension OD:41mm, ID:25mm, T:1mm
