Sunlu Dryer Holder for AM8 or Prusa Bear (2040 extrusions).

Modified version of the filament dryer holder to be installed on 2040 extrusions, the holder snaps in place, no need for screws or t-nuts or anything as such, the spacers are completely optional but I included them anyways.

Credit to the original designer, check out their design for original Prusa i3.

Also credit to Denos over on thingiverse for their amazing spool holder design which was also used to adapt this remix.
