Summary

Automotor Malaxa 900. 100 of this railcar were made in Romania. Some of them are still working nowadays.

The motor is Mabuchi 010. Also you need M2 screws with nuts. Un automotor pe care sa il poata tipari 3D toti pasionatii din Romania. Daca aveti planuri de la locomotive romanesti va rog sa mi le trimiteti la rhnegativ@yahoo.com pentru a face alte modele 3D.
