updated 8. 9. 2023 | published 8. 9. 2023

### Summary

Replace your standard Creality spool holder.

[3D Printers](#) > [Creality Parts & Upgrades](#)

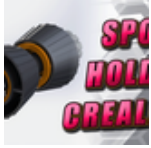

Tags: [spool](#) [spoolholder](#) [filamentspoolholder](#) [filamentholder](#)

Use this with Embrace Makings Smooth Spool Holder upgrade. <https://www.printables.com/model/177345-creality-smooth-spool-holder-upgrade>

Use supports and 0.2 layer height.

This is an alternative to removing the small lip on the front of the original creality spool holder in order to slide the assembly onto the spool holder. If you are using a standard spool holder, you will need to remove the small lip on the front of the spool holder. Check out this video (at 37s) for more info
