Summary

An adjustable replacement foot for a small Honda generator.

Tags: [foot](#) [generator](#) [repair](#)

Replacement feet for a small Honda generator. Needed the generator to stand off the ground a little higher. Wanted to be able to adjust the leveling as well.

Uses M10 Hex bolt (16mm in length) and M10 nuts. I used locking nuts so the vibration didn't effect the leveling.

The footpad is meant to be printed in a flexible material. I used overture TPU.
