### Summary

REMIX from <https://www.thingiverse.com/thing:5139867>

[3D Printers](#) > [Accessories](#)

This is a REMIX from the amazing "Ender 3 X Gantry Dial Gauge Indicator Mount" from this YouTube video:

I just modified the original to be flat so it can work on printers that have flat surfaces like my **Anycubic** Kobra (standard) and my Elegoo Neptune 3.

I printed with no supports too (since it can be flat on the plate).

Because of material shrinkage and maybe lack of precise dimension tuning from my part, in my case, printing **eSUN** PLA PRO (PLA+) Black, I had to change the dimensions on **Prusa** to 100.5% the original size.
