A bowtie for your parties :)

It is made to receive a ribbon, there is an attach system for the back of the neck as well (honestly the attach system I made could be better ^^)

The "bowtie inclineur" can be used as an option : you glue it on the lower part of the back of the bowtie in order to make it more vertical when you wear it.

### Print Settings

#### Notes:

Printing :

0.2mm nozzle looks way better.

Put high filling % or high number of upper layers for better looks.
