Summary

Not sure how I got myself into the pickle, but I needed to remix side a into side c, to finish my border, so here it is.

I printed a wall of 6 x wall-honeycomb-224x190size(mk3s).stl sections.

When I came to put a border around the edge, I could not find a side piece that fit the final spot. I probably goofed something up, but remixing this piece seemed the fastest way to recover and move on.

Sharing it here in-case someone else finds they also need it.
