Summary

Print in place, 42 min

[3D Printers](#) > [Accessories](#)

Tags: [sponge](#) [wipe](#) [dust](#)

Simple clip-on to clean the filament before the extruder. Dusty filament can occlude or abrade the nozzle over time.

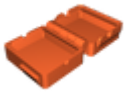

The hinge will feel blocked. Once the resistance is broken, it moves perfectly free.

Recommended sponge size: Approximately 25 x 30 x 8 mm.

Print in place, no supports.

I printed it in PLA, 0.2 mm on MKS3+ and it took only 42 min.
