[Hobby & Makers](#) > [Automotive](#)

I have bought white/yellow WY21W switchbacks for DRL on my 06 Outback. I do not like to see connector unprotected or covered by electrical tape. So I made simple cover that also hold resistor (M3 screw) and could be mounted with M6 bolt or zip tie. Hole for wires is sealed with hot glue / silicon sealant. On left side I had some empty holes on bracket behind battery so I could mount it with screw. On right side I had to mount it with zip tie on back side of bracket between headlight and airbox.
