A simple bookmark that shows a spooky bat on the outer face and which uses a fin to separate a book's pages. An easy, fast print.

The bookmark works best on paperbacks but it can also accommodate hardcovers by simply pulling the bookmark out a few millimeters (the fin is deep enough to be retained in the pages).

Similar bookmark designs are available in my profile so please check them out and, if you'd like to make a request for a particular object to be modelled, then send me a message and I'll do my best to help.
