Summary

Vallejo Paint bottle storage made from empty Filament Reel Holder

[Hobby & Makers](#) > [Other Ideas](#)

I utilised a 500g empty Amazon BasicFil Filament Reel to make a Vallejo Paint Bottle Storage

I Eyeballed & Drilled 16 25mm holes in one side of Filament Reel

(My placement was by eye although I have now created & added a placement template)

I used 22mm dia 608 Bearing in the Solid 52mm bearing holder/connector

This was fitted to bottom of Reel
