Do you have some nice looking coins or things to be presented and you can not find any good stand solution?

With this print you can create your very own presenter which fits your individual needs.

The print files contains a OpenSCAD file which can be modified with OpenSCAD customizer. You don't need to know each single parameter. The parameters are described within OpenSCAD and at the preview pictures I have added a legend for each single parameter which changes the look of your presenter.

**You will need OpenSCAD to render STL files which will be printed**

## Print instructions

The presenter can be printed without support and infill.

At least two walls are necessary. If you want to have it more reliable increase this value.

## Model files

**coin-presenter-v3.scad**
