Summary

Replacement insert for a Stanley 10-425 breakaway knife.

Tags: [breakaway](#) [stanleyknife](#)

I had an old Stanley 10-425 breakaway knife that was missing the insert that attaches to the replaceable blades. The insert is probably only taylored to this specific model. I had a screw in knob already I thought went with the knife. It now works like the original.

Printed in PETG on flat end with a brim and supports under pole that goes through the blade.
